Register

Click to login

This screen allows new users to create an account in the budgeting app.

It contains input fields for Full Name, Username, Email, Password and Confirm Password, and Date of Birth. There is also a Register button to submit the form to register as a new user.

It also contains a Click to login link for users who already have an account.

Things that happen on this screen

The user fills in the fields as shown.

Pressing Register button triggers code to register the user using Firebase Authentication and sets up a user document (like a database row entry) in Firestore so the user can begin using the app immediately.

If the registration is successful, the user is redirected to the Home screen to begin using the app.

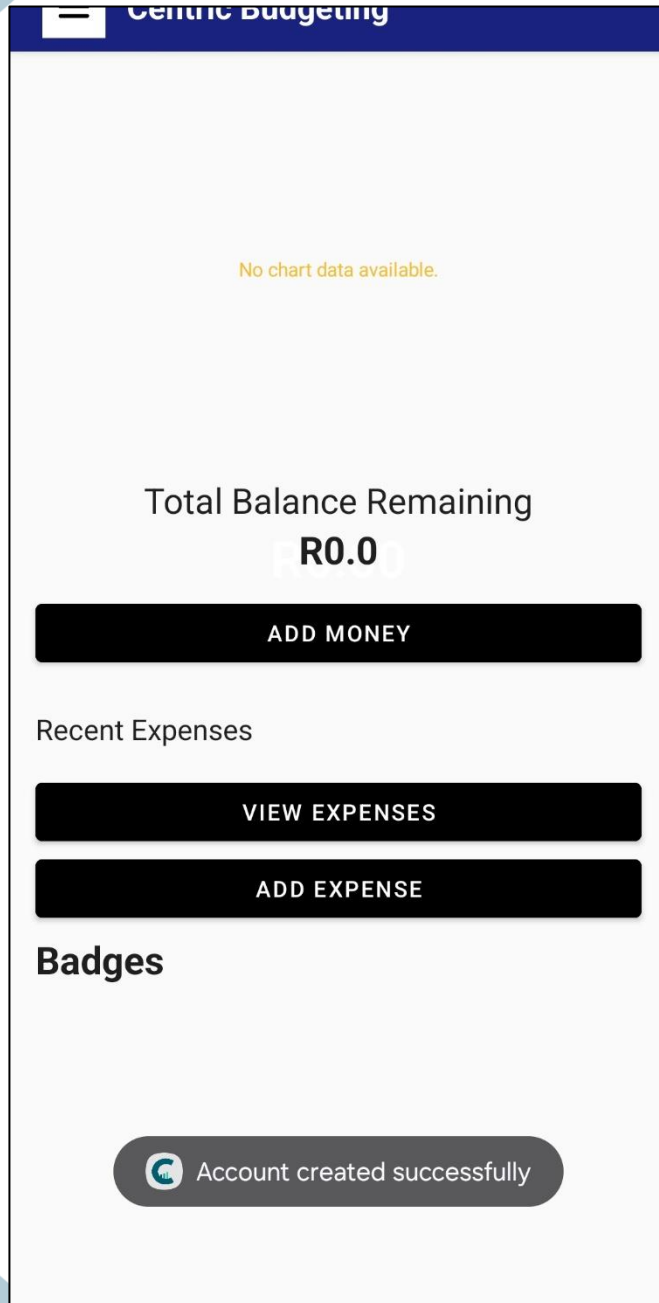

If the user already has an account, they can tap Click to login to go to the login screen instead of registering.

Date

SAVE EXPENSE

This screen allows users to log new expenses. It lets the user give a description of the expense, the amount and select a category for it to fall under. You can also set the date so that new users can add expenses from before they made an account.

Things that happen on this screen

User enters a description of the expense and the amount of the expense and they pick a category for the expense to go under and then pick the date the expense occurred.

SAVE EXPENSE

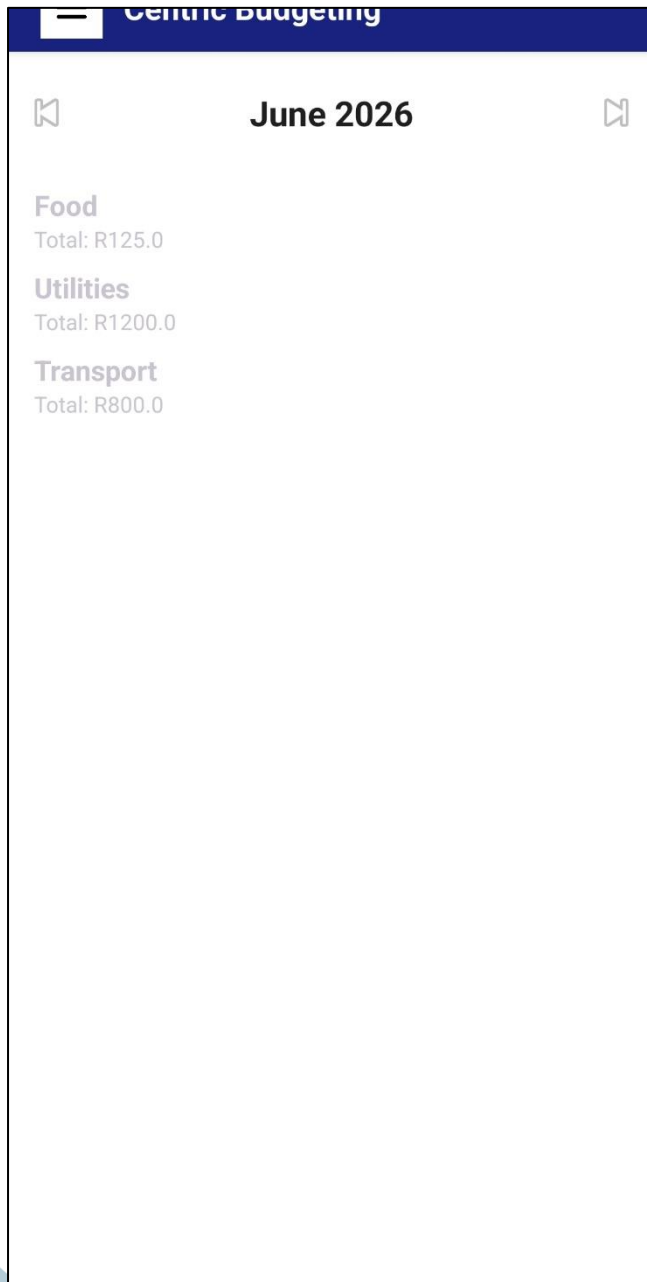

The screenshot shows a mobile application interface for 'Central Budgeting'. At the top, there is a dark blue header bar with a white minus icon on the left and the text 'Central Budgeting' in white. Below the header, the screen has a white background. The title 'Add Category' is displayed in bold black text. Underneath the title is a text input field with the placeholder text 'Category Name'. At the bottom of the screen, there is a dark blue button with the text 'SAVE CATEGORY' in white capital letters.

This screen serves to let the user create a category of their own, so the user may further customize their experience.

Things that happen on this screen

User can tap the field to enter a category name and then save that category by clicking the button.

This screen lets the user see all total expenses sorted by category for the selected month. The user may change months at will using the arrow icons.

Things that happen on this screen

User can view the category totals

Enable Minimum Goal (Savings) ☐

Minimum Amount (e.g. R500)

Enable Maximum Goal (Limit) ☐

Maximum Amount (e.g. R2000)

SAVE BUDGET GOALS

This screen lets users set budget goals for a category. We let the user choose if they want to have goals so that the user feels empowered.

Things that happen on this screen

User can set goals for specific categories and toggle them on and off.
